PROFESSIONAL SUMMARY

Mobile Application Developer with 5+ years of professional experience building and maintaining native iOS and Android applications. Strong recent focus on iOS development using Swift, SwiftUI and UIKit, backed by professional Android experience with Kotlin and Java. Experienced across fintech, banking, e-commerce, enterprise and engagement products, with hands-on work in REST API integration, Firebase, local persistence, MVVM/Clean Architecture, testing, secure data handling and production app releases.

SKILLS & STRENGTHS

iOS Development: Swift, SwiftUI, UIKit, Objective-C, Foundation, Combine, Core Data, Realm, MapKit

Android Development: Kotlin, Java, Android SDK, XML Layouts, Material Design, Room, Retrofit, Google Maps

Architecture & Principles: MVC, MVVM, Clean Architecture, SOLID Principles, Design Patterns, Dependency Injection, Protocol-Oriented Programming, Object-Oriented Programming (OOP)

Networking & Services: REST APIs, URLSession, Alamofire, async/await, Firebase, FCM, Push Notifications

Mobile Features & Integrations: Payment Gateway Integration, WebView, PDF Handling, Charts, Deep Links, File Upload/Download, Camera & Gallery, Third-Party SDKs

Tools & Source Control: Xcode, Android Studio, Git, GitHub, Bitbucket, Postman, CocoaPods, Swift Package Manager

Security & Authentication: SSL Pinning, Keychain, Encryption, Biometric/Face ID Authentication, Jailbreak Detection, OTP Authentication

Testing & Release: XCTest, Unit Testing, UI Testing, TestFlight, App Store Connect, Google Play Store, Fastlane, CI/CD

EXPERIENCE

iOS Developer

M3 TECHNOLOGIES PAKISTAN (PVT) LTD.

01/2023 – Present
Karachi, Pakistan

- Develop and maintain production iOS applications using Swift, SwiftUI, and UIKit, including fintech, investment, and enterprise solutions.
- Design scalable application features using MVVM and Clean Architecture, applying SOLID principles, dependency injection, and reusable components to improve maintainability and testability.
- Build and integrate complex REST API workflows using URLSession/Alamofire and Swift concurrency (async/await), including authentication, error handling, data mapping, and API-driven business flows.
- Implement application security measures including SSL pinning, secure local data handling, Keychain/encryption techniques, and jailbreak detection for security-sensitive mobile applications.
- Manage TestFlight and App Store releases, including build preparation, signing/provisioning, release configuration, submission, and post-release support.

Mobile App Developer

UHF Solution

05/2022 – 12/2022
Karachi, Pakistan

- Developed features for a Salesforce/CRM-driven sales application, including branch listing, user authentication, and customer/lead workflows.
- Implemented offline data storage and caching using Room to support application functionality with limited connectivity.
- Developed data visualization features using charts for business and sales-related information.

- Worked across multiple mobile projects, handling feature development, REST API integration, debugging, testing, and application enhancements.

Mobile App Developer

05/2021 – 04/2022

Dusky Solution

Karachi, Pakistan

- Developed native Android and iOS applications using Kotlin, Java, Swift, and UIKit across multiple client projects.
- Integrated REST APIs, Firebase services, maps/location functionality, local databases, and third-party SDKs across mobile applications.
- Implemented payment integrations and business-critical application workflows for client projects.
- Managed application builds and contributed to production releases on both Google Play Store and Apple App Store.

Android Developer

11/2020 – 04/2021

1 Social Media

Karachi, Pakistan

- Developed native Android applications using Kotlin, Java, Android SDK, and XML layouts.
- Built responsive application screens and reusable UI components following Material Design guidelines.
- Integrated REST APIs to retrieve, process, and display dynamic application data.
- Collaborated with senior developers to implement new application features from requirements through development, testing, and release.

PROJECTS

Youniform - E-Commerce Application | Android

Kotlin | Retrofit | Firebase OTP | Stripe | Easypaisa

- Developed product browsing, cart, checkout, authentication, and order-related functionality.
- Integrated Stripe and Easypaisa payment solutions and handled payment-driven checkout workflows.
- Implemented Firebase OTP authentication, REST API communication using Retrofit, and WebView-based functionality.

Froffer - Engagement Application | Android

Kotlin | Retrofit | Firebase/FCM | Teller Payment Gateway

- Developed user-facing Android features and integrated REST APIs for dynamic application workflows.
- Implemented Firebase Cloud Messaging (FCM) for push notifications and user engagement.
- Integrated Teller payment gateway functionality and supported application workflows around payment processing.

ABL Funds - Mutual Funds Application | iOS

Swift | UIKit | MVVM | async/await | MapKit | Security

- Developed investment and portfolio features using Swift, UIKit, MVVM, REST APIs, and async/await.
- Implemented security measures including SSL pinning, encryption, Keychain-based secure storage, and jailbreak detection.
- Worked with MapKit, biometric authentication, WebView, PDF functionality, Firebase/FCM and other production integrations.

AKD-IML - Financial Investment Application | iOS

Swift | UIKit | MVVM | Biometrics | Security | Charts

- Implemented Face ID/biometric verification, OTP-related workflows, Keychain storage, encryption, SSL pinning, and jailbreak detection for security-sensitive functionality.
- Developed investment and portfolio features along with charts, WebView, and PDF/report functionality.
- Integrated REST APIs using URLSession/async-await and contributed to production stability and application releases.

EDUCATION

Bachelor of Business and Information Technology

2023

Virtual University Of Pakistan

Karachi

Intermediate

2019 – 2020

Board Of Karachi

Karachi, Pakistan

Software engineering

2020

Aptech Learning

Karachi
