EXPERIENCE

iOS Developer

M3 TECHNOLOGIES PAKISTAN (PVT) LTD.

01/2023 – Present
Karachi, Pakistan

- Developed and maintained scalable iOS applications using Swift, SwiftUI, and UIKit in Agile environments.
- Implemented MVVM and Clean Architecture, improving modularity and long-term maintainability.
- Integrated 10+ REST APIs using async/await, improving performance and reducing latency by 35%.
- Built reusable UI components and improved app responsiveness with optimized loading strategies.
- Led App Store releases with a 100% approval success rate.
- Improved code quality through unit testing, peer reviews, and structured development practices.
- Collaborated with cross-functional teams to deliver features aligned with business requirements.

iOS Developer

UHF SOLUTION

05/2022 – 12/2022
Karachi, Pakistan

- Developed enterprise mobile applications with third-party integrations including CRM systems.
- Implemented secure data handling using CryptoSwift and best practices for local storage.
- Integrated Firebase notifications and analytics, improving user engagement and retention.
- Delivered new features while maintaining app performance and reliability.

iOS Developer

DUSKY SOLUTION

05/2021 – 05/2022

Karachi, Pakistan

- Delivered multiple iOS applications using Swift, SwiftUI, and UIKit across different domains.
- Collaborated with designers and backend engineers to deliver high-quality features.
- Built reusable components to accelerate development and ensure UI consistency.
- Successfully managed multiple projects and met delivery timelines.

iOS Developer

1 SOCIAL MEDIA

11/2020 – 04/2021

Karachi, Pakistan

- Developed mobile features for a social media platform using Swift and REST APIs.
- Collaborated with backend teams to design and integrate APIs.
- Delivered features across sprint cycles while maintaining code quality.

PROJECTS

Youniform – E-Commerce Application | Swift, UIKit, REST APIs, Payment Integration

- Developed a complete e-commerce app with product browsing, cart, checkout, and order tracking.
- Integrated payment gateway and real-time backend services.

UBL CE - Enterprise Application | Swift, UIKit, MVVM, Realm

- Built a scalable enterprise solution for internal operations and data access.
- Implemented offline storage and optimized data handling.

Froffer – Engagement App | Swift, UIKit, Firebase, Push Notifications

- Built real-time user engagement features with Firebase push notifications and analytics to improve user retention.
- Developed scalable and reusable UI components using Swift and UIKit, ensuring consistent user experience across multiple screen sizes.

ABL Funds – Mutual Funds App | Swift, UIKit, MVVM, REST API, async/await

- Built a live App Store mutual funds investment app enabling users to monitor portfolios and track market performance.
- Implemented secure REST API integration with async/await and MVVM architecture for robust, maintainable performance.
- Successfully delivered and published ABL Funds on App Store – enabling retail investors to monitor mutual fund portfolios and track market performance in real time.

AKD IML – Financial Investment App | Swift, UIKit

- Built a financial investment app with fund exploration, portfolio tracking, and PDF report generation.
- Focused on app stability, security, and scalable architecture for a demanding financial user base.
- Used by investment clients for daily portfolio monitoring.
